

*Hi everyone,*

*Our group (Experimental Cardiology, Erasmus MC) is looking for students who want to do experimental work for 6+ months within the fields of cardiovascular disease. We predominantly conduct research about heart failure and cardio-oncology. Therefore, interests in oncology, immunology and multi-system diseases can also be explored.*

*If you are interested, please send an email to [l.yousif@erasmusmc.nl](mailto:l.yousif@erasmusmc.nl) with your CV and a short motivation letter.’’*
